96776 89300 | Bengaluru | amurdhavanibs@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Clinical research and clinical data professional with experience across IQVIA and NHS UK research environments. Currently supporting leading global pharmaceutical companies at IQVIA with clinical trial data anonymisation, working with CDISC-aligned datasets, including SDTM and ADaM using SQL and Python. Experienced in clinical data management within NHS UK, including clinical data review, cleaning, validation, reconciliation, query management and quality control using Medidata Rave, REDCap and Veeva EDC. Hands-on experience in de-identification techniques, risk measurement, peer QC, CSR redaction and delivery of quality-controlled anonymised datasets. Strong understanding of clinical research processes, medical terminology, ICH-GCP, GDPR and data governance, supported by a BDS and a Master's in Public Health (Data Science).

KEY ACHEIVEMENTS

- Worked with leading global pharmaceutical companies at IQVIA and within NHS UK clinical research, supporting high-quality clinical data delivery across diverse studies.
- Managed clinical data across 15+ studies, including CRF/eCRF design, edit checks, query management, reconciliation and database readiness.
- Maintained >98% data accuracy across 10,000+ clinical records, using Medidata Rave EDC, Veeva EDC and REDCap while collaborating with Principal Investigators and study teams.
- Supported anonymisation of ~5 clinical studies per month, working with SDTM/ADaM datasets, SQL, Python and de-identification techniques for global pharmaceutical clients.

PROFESSIONAL EXPERIENCE

IQVIA, via HORIZONTAL INTEGRATION CLINICAL TRIALS DATA ANONYMISATION ANALYST

**BENGALURU
June 2026 - Current**

- Supported anonymisation activities for approximately 5 clinical studies per month for leading global pharmaceutical companies, contributing to privacy-protective delivery of final clinical datasets and supporting outputs within agreed quality and delivery timelines.
- Managed and processed 20+ SDTM and ADaM datasets per month within CDISC-aligned clinical trial data, reviewing and preparing multiple clinical domains for anonymisation and de-identification activities.
- Performed peer Quality Control (QC) of colleagues' anonymisation work, using systematic validation and cross-checking techniques to maintain ~99% accuracy across anonymised clinical datasets and final outputs.
- Utilised SQL and Python, including relevant Python data-processing libraries, to profile, transform, validate and quality-check 10,000+ clinical data records per month, supporting efficient and consistent anonymisation workflows.
- Assessed direct and indirect identifiers across 20+ clinical datasets per month, applying 4+ anonymisation/de-identification techniques, including suppression, generalisation, masking/pseudonymisation and date shifting, according to study-specific and client requirements.
- Created and reviewed 5+ risk-measurement and uniqueness assessments per month using Eclipse, evaluating data uniqueness and potential re-identification risk to support anonymisation decisions and final quality review.
- Performed document redaction of 5+ Clinical Study Reports (CSRs) and related clinical documents per month, protecting sensitive and potentially identifying information prior to privacy-compliant delivery.
- Conducted pre- and post-anonymisation QC for approximately 5 clinical studies per month, investigating missing/null values, date inconsistencies, cross-study subject alignment and transformation exceptions to support accurate final dataset delivery.

ROYAL BERKSHIRE NHS FOUNDATION TRUST RESEARCH ASSISTANT

**READING, UK
May 2024 - Oct 2025**

- Managed clinical data activities across 15+ clinical studies in 5 therapeutic areas, supporting study data from patient enrolment and data collection through database review and study close-out.

- Performed CRF/eCRF data entry and review across 3 clinical data platforms - Medidata Rave EDC, Veeva EDC and REDCap maintaining >98% data accuracy across clinical study records.
- Conducted data cleaning, validation and reconciliation across 10,000+ clinical records, investigating missing values, inconsistent data and source-to-EDC discrepancies to support complete and audit-ready clinical datasets.
- Performed User Acceptance Testing (UAT) across 5+ clinical data capture workflows, validating CRF/eCRF functionality, field requirements, data-entry rules and system outputs to support reliable study implementation.
- Executed edit checks and managed clinical data queries across 15+ studies, identifying data discrepancies, tracking outstanding queries and supporting >95% timely query resolution prior to database review and close-out.
- Supported screening, eligibility assessment, informed consent and enrolment of 50+ potential study participants, ensuring protocol adherence, accurate source documentation and compliance with ICH-GCP requirements.
- Used R and SQL to analyse, validate and prepare 10,000+ clinical records for downstream analysis, supporting data integrity and preparation of analysis-ready datasets in accordance with ICH-GCP and GDPR requirements.

SAVEETHA DENTAL COLLEGE
DENTAL INTERN

CHENNAI
October 2018 - August 2020

- Performed 1,900+ dental procedures across 500+ patients, combining clinical care with structured research data collection and protocol-based assessments.
- Published 10 peer-reviewed research papers and delivered 15+ national and international conference presentations.
- Organised and delivered 20+ public health dental camps serving 1,000+ underserved patients.

SKILLS

- **Clinical Data Standards:** CDISC, SDTM datasets/domains, ADaM datasets, structured clinical trial datasets, clinical data review and validation.
- **Data Anonymisation & Risk:** Direct/indirect identifier assessment, suppression, generalisation, masking/pseudonymisation, date shifting, uniqueness and re-identification risk assessment, risk-measurement tables.
- **Document Anonymisation:** Clinical Study Report (CSR) redaction, sensitive-information identification, privacy-focused document review.
- **Programming & Data:** SQL, Python and Python data-processing libraries, R, Power BI, data profiling, transformation, validation, reconciliation, dataset preparation.
- **Clinical Systems:** Medidata Rave EDC, REDCap, Veeva EDC, EPR.
- **Quality & Compliance:** ICH-GCP, GDPR, data governance, audit-ready documentation, clinical trial data handling.

EDUCATION

Master of Public Health (Data Science Specialisation) University of Glasgow Glasgow, UK	2022-2023
Bachelor of Dental Surgery Saveetha Dental College Chennai	2014-2020

CERTIFICATIONS

- Registered Clinical Research Practitioner (CRP), Academy for Healthcare Science (AHCS), UK | 2024
- Good Clinical Practice (ICH-GCP), NIHR | 2024
- GDPR & Information Governance, NHS | 2024

RESEARCH AND PROFESSIONAL HIGHLIGHTS

- 10 peer-reviewed publications
- 15+ national/international conference presentations
- Experience across NHS, academic and global pharmaceutical clinical research environments
